

'The Light in The Dark' Stereo Power Amplifier

This fully balanced power amplifier derives its sonic splendor from a valved input stage that is based on 4 x E88CC dual triodes. In keeping with EINSTEIN's advanced concepts, 'The Light In The Dark' offers ultra-wide bandwidth and a dual mono architecture to guarantee relaxed

control and exemplary detail retrieval.

When mated with our EINSTEIN linestage 'The Tube', bass runs are reproduced with unheard-of speed that reveals sonic vistas previously only hinted at.

- Fully balanced power amplifier
- Dual-mono design
- Ultrawide bandwidth
- High current output stage
- S/N ratio → 96dB
- THD ← 0.02%
- Channel separation → 80dB
- Damping factor → 250/8 ohms

- Output power 80 watts into 8 ohms, 115 watts into 4 ohms
- Input sensitivity 1V for full rated power
- Tube complement: 4 x E88C /6922 dual triode
- Weight 20 kg
