

'Vivace' / 'Vivace Superiore' Speaker Cables

The 'Vivace' is a warm-sounding simple design with universal applicability to work well with numerous components.

The 'Vivace Superiore' has a similarly well-balanced signature but becomes even more expressive in the midrange and treble. Bass remains extended and fully

developed. Both cables are extremely low-microphony designs.

'Vivace'
- rubber sleeve
- multistrand cable with high-purity copper conductors in rubber dielectric

'Vivace Superiore'
- rubber sleeve
- high-purity copper conductors, 3 dedicated solid-core runs of staggered diameters for the

mid/treble band, Teflon dielectric, discrete bass leg of multi-strand construction with rubber damping
